

Central European Cooperation in Smart Specialisation on the Application of ICT and Advanced Manufacturing Solutions in the Food Supply Chain workshop on 4-5 April 2018 in Budapest, Hungary

The main objective of the event was to create a professional forum for regional actors (i.e. enterprises, intermediaries including food industry federations, chambers of industry and agriculture, research centres, higher education, research and innovation agencies, funding agencies and clusters) being active in food processing and other steps of the food chain, in development of ICT and advanced manufacturing solutions for a dialogue on international transdisciplinary RDI cooperation for application of these solutions in the food chain.

Approximately 100 people participated on the event. Related to the precision agriculture, the SweetVeg project was presented by a new roll-up and the interested participants got information about the objectives of the SweetVeg project. The SweetVeg leaflets was also distributed.
